Spice Pull-Out Insert | FUNCTIONAL

YOUR PLACE FOR EVERYTHING.

A home needs to be more than simply beautiful – it must be functional.

So look for cabinets with a wide range of storage and working features that save space and time.

This is the room where your family's true nature shines brightest.

It's the secret, no-peeking staging ground where dozens of cakes will be made and countless candles lit.

It's where ABCs are learned, spelling words memorized, and mathematical equations tough enough to scare off the smartest parents get solved.

It's the first-of-the-morning coffee, dinner's second piece of dessert, and late night's snack. It's a place to share big news and dumb jokes. A place that will bear witness to the joys and tears and hugs that see you through a lifetime.

The kitchen is the place where your family really, truly lives. If you're just making do with the counters and cabinets that came with the house, it's time to create a place that fits your family's needs, style, and personality.

YOU'RE BUILDING
FAR MORE THAN
JUST A KITCHEN.

Pop-Up Mixer Shelf | ACCESSORY

Drawer Peg System | ACCESSORY

ONE SIZE NEVER FITS ALL.

Don't sacrifice the kitchen you want for the dimensions that are convenient for some manufacturer to build. Your designer can help you find a source that will work to fit your dimensions, and answer your needs for the perfect kitchen.

PULLING IT TOGETHER.

With so many choices, and woods, and styles, and finishes, how in the world can you even begin to pick out the right cabinets for your kitchen?

It's easy. You start where you are, with who you are.

Working with your designer, you take stock of what you like — and just as importantly, what you don't. How do you describe "beautiful"? How hard-working does "functional" need to be to work for your family?

Share your thoughts and visions of the perfect kitchen with your designer, and he or she will help take you right where you want to be.
